Get Ready For a Good Time at Irma Wednesday, June 12th

IRMA SPORTS DAY, JUNE 12th

Next Wednesday, June 12th is, Irma's annual sports day. If the weather man furnishes good weather, everybody may be assured of a real good time.

A high class baseball tournament is looked forward to when some of the best teams in this neck of the woods will play for a purse of \$150.00.

The foot races are bound to attract a lot of attention, the committee has arranged a full range of these for all ages.

The greasy pig chase promises to be a slippery affair, as the pig is going to be well greased, and the little porker for the little folks to catch is now getting ready to run like everything.

The Viking Band will be here to furnish music.

There will be ample refreshment accommodations on the grounds. A good show and dance in the evening will be a climax to the day. Get ready for a real holiday at Irma, June 12th.

ANNOUNCE REDUCTION IN AMUSEMENT TAX

The existing tax on low priced tickets of admission to such places of amusement and entertainment as moving picture houses, chautauques, etc. has been cancelled by a recent order in council of the Alberta Government. Admission prices not exceeding 25c will hereafter be exempt from tax, the only exception being places for public dancing. No change will be made in the case of tickets for which more than 25c is charged.

The Woman's Auxiliary of the Anglican Church had a very successful Whist Drive in the Masonic Hall on Friday evening last. This being our first attempt to raise funds they wish to thank all those who attended or assisted in any way to make the evening so successful.

The next meeting of the W. A. will be held at Mrs. Fred Higginson's on Tuesday, June 11th at 3 p.m. sharp.

The next regular meeting of the Irma Ladies Aid will be held at the home of Mrs. S. Johnson. All ladies are invited to attend.

CHURCH NOTICES AND ACTIVITIES

ANGELICAN CHURCH

Anglican Church Service, Sunday at 11 a.m.

A service will be held in the Masonic Hall on Sunday next, June 9th at 11 a.m.

A. M. Trendell, Vicar Wainwright The Booth Committee of the Irma Agricultural Society would consider it a favor if all ladies interested in the advancement of the Agricultural Society would donate pies for the booth on Sports Day, June 12th, 1929.

ALCOHOL AS A MEDICINE

Dr. J. N. Bishop, a practicing physician of 50 years standing and a long-time member of the Board of Managers of the National Temperance Society, as follows:

"As a physician of many years, I have had an opportunity of studying the effects of alcohol on those of all ages and conditions. No one can convince me that this so-called drug is in any way a direct benefit to any human being. It is a foreign stimulant—creates a habit and in no way used internally has any beneficial results that are lasting. It must be marked and looked upon as a poison, and I so recognize it, and it is not only harmful for those of all ages, but is harmful and its effects are shown on pre-natal and hereditary influences. This means a very marked effect for harm on large numbers of our citizens that could not be fully overcome by medical skill or personal influence."

"As one of the officers of The National Temperance Society, I have had, in many ways, a good chance, not only in our own country, but in the many countries of the world to see the curse of alcoholic drinks."

"The time has come—the call is made—for everyone who has a love of country and desires to see it prosper; for all citizens to be loyal to every law of the land; to stand firm and speak by the ballot for those who make our laws, and to help direct the enacting and enforcement of them in the right direction."—Chas. E. Maniere.

ANOTHER WELL BELCHES GAS

(From Viking News)

Another well well came into production in the local gas field on Thursday afternoon when Hudson-Bay Marland well No. 2, was brought in to the tune of 8,300,000 feet of gas per day.

A number of gas officials together with Mr. Slipper, the company's geologist, were present.

The roar of the escaping gas could be heard for miles. The well has been capped and will be connected with the rest of the fifteen wells now supplying gas for consumers between here and Edmonton.

The machinery is being moved to another location where it will be used to drill a well for the Northwestern Utilities.

Work of constructing the subsidiary gas main will be commenced as soon as the pipe arrives from the States.

CULTIVATION OF PERENNIALS IS GROWING IN POPULARITY

Generally speaking the plants can best be divided or planted in the spring as early as possible after the frost is out of the ground. There is, however, one exception, the peony, which should always be planted in the early fall, so that it may get its feeder roots well started for the early production of foliage and blooms in the spring.

The peony is possibly one of the best of the hardy perennials and as there are a great number of varieties which bloom at different times it is possible to have, by planting several selected varieties, continual blooms for many weeks in the spring.

Possibly the earliest of the perennials is the Iceland poppy, which grows almost like a weed. Very early in the spring the delicate yellow and red colors of this flower make a beautiful splash of color before anything else is blooming. They bloom continuously through the summer until frost comes and seed themselves profusely.

The Iris is another beautiful perennial and comes in so many varieties of coloring and times of blooming that there can be blooms for several weeks during the early spring. The sword like foliage is always a decoration to the bed, even after the blooms are gone.

Aquilegia is another beautiful plant which adds to the beauty of the border with its delicate colorings and beautiful foliage and is quite hardy here.

Lilies are proven hardy in many varieties, and make another very beautiful addition to the garden. The prairie lily, tiger lily, Siberian coral lily, elegans, red lily are all hardy here. There are some dozen or so varieties which grow well in this climate.

Flower Grows Popular

The viola, the beautiful pansy-like flower with its wonderful rich colors in so many varieties, is becoming more and more grown here.

The delphinium, in its varied blues and mauves, is a magnificent background for the flower bed, or, if planted in clumps in front of the shrubbery makes beautiful coloring during most of the summer. If a circle of chicken wire is supported by a stake or two and placed around the plants when small it will support the spikes and keep the plants together when the winds come, and add to the symmetry of the clump and the wire will not show as the leaves and spikes grow through the mesh.

One may almost call the rose a hardy perennial, as there are many which will come through with a little protection from the early thaws and well repay one the attention given them.

Scarlet lichens is another brilliant plant which will do well in this climate and comes in two or three colors. It gives beauty to clumps of shrubbery and is well worth growing.

Most of the Irma citizens took in the Jarro Sports Monday afternoon. While watching the ball game in the evening Mr. J. Levett, of Irma, was hit on the jaw, resulting in a very painful accident. A good crowd turned out and everyone seemed to be well pleased with the programme.

NEWS ITEMS FROM KINSELLA

Mr. Jack Stronach who is teaching at Smoky Lake spent the week end and holiday with his parents here, returning on Tuesday morning to his school.

Miss Irene Wachter has accepted a position in Edmonton. She and her mother went to the City on Friday evening. Mrs. Wachter returned home on Monday.

Mrs. Scott, President, of the W. I. spent last week in Edmonton, she returned home on Saturday.

Mr. and Mrs. E. C. Williams and family motored to Ponoka on Sunday to visit the latter's sister and family. They returned home Monday evening.

Quite a number from here attended the Sports at Jarro on Monday, June 3rd.

All those who were in quarantine for scarlet fever are out again.

Mr. Claude Bishop of Vermilion visited his sister, Mrs. Neale, on Sunday. His mother returned home with him after spending the past five weeks helping to care for his granddaughter Ellen Neale who was ill with scarlet fever.

Mr. W. Greenwood, north of Kinsella has purchased six hives of bees from Mr. H. W. Love of Irma and expect to help supply the Kinsella district with honey this fall.

Mr. and Mrs. Batchelor and family of Fabyan called on William Anderson, Sunday afternoon.

The C.N.R. shovel, in the pit, broke down on Friday evening and was tied up for a couple of days waiting for repairs but commenced work again on Monday evening.

Mr. Gordon Barber is working for Frank Williams in the garage.

Miss Isabel Stronach returned home from Normal at Camrose on Friday evening.

Messrs. Gordon and Stuart Fenton of Irma and Miss Norma McConnachie of Edmonton called on Mr. and Mrs. R. Eaton Sunday evening.

Mrs. F. Dorman and six young girls who were in the car with her nearly suffered a serious accident near here. Although parts of the car were badly damaged, the occupants all escaped with minor injuries. The party was on its way to Wainwright, where the girls were to take part in a musical program. They proceeded to Wainwright, while Mrs. Dorman drove the damaged car, which is the property of Dorman and McCracken, back to Sedgewick. The other occupants of the car were, Victoria Parsons, Bertha Anderson, Marion Gammond, Willa Oaks, Bettie Clemens and Gwen Dorman.

FIRST TRANSATLANTIC FLIGHT

The first Trans-Atlantic flight was successfully accomplished by two British aviators, Captain John Alcock, D.S.C. pilot, and Lieutenant Arthur Whitten Brown, navigator, the machine used was a Vickers Vimy Rolls Royce twin engine.

It was a marvelous flight and greater glory attaches to it because it was made under bad weather conditions; indeed fog so obscured vision by times that the machine was at one time discovered to be flying upside down and once only fifty feet from the water.

The project of the Atlantic flight was originated by the late Viscount Northcliffe in the London Daily Mail in April, 1913, and suspended during the war.

Captain Alcock & Lieutenant Brown left St. John's, Newfoundland at 5:13 P.M. Saturday, June 14th, 1919, and landed near Clifden, Galway, Ireland at 9:40 the next morning, a flight of 1880 miles, taking only fifteen hours fifty-seven minutes, a truly marvelous flight, which won for the victors a prize of 10,000 pounds.

Both Captain Alcock and Lieutenant Brown were knighted by His Majesty the King in 1919. Sir John Alcock crashed during a flight about a year later and was killed.

NOT EASY

It is not always easy—
To apologize.
To begin over.
To take advice.
To be unselfish.
To admit error.
To face a snarl.
To be charitable.
To be considerate.
To avoid mistakes.
To endure success.
To keep on trying.
To be broadminded.
To forgive and forget.
To profit by mistakes.
To think and then act.
To keep out of the rut.
To make the best of little.
To shoulder deserved blame.
To maintain a high standard.
To recognize the silver lining.
But it always pays.

NEWS ITEMS FROM JARROW

On Monday, June 3rd the Annual Sports Day was held. A large crowd attended and a good days sport was indulged in. In the morning the school children parade and decorated car parade were the principal features. Mr. Symonds won first on his car and Mr. A. McGregor second. In the afternoon the Coal Springs Junior baseball team won from Jarro and Irma receiving first money. The Irma ball team won from Jarro in the senior baseball. There was good horse races bucking horse contests, races for children and grown-ups, climbing the greasy pole and amusements for all. The booths were well patronized during the day and an excellent dance in the school was the entertainment for the evening. The school was crowded and many turned away, which shows us once again the need of our hall which we hope will be built before another sports day. The Board of Trade are to be congratulated on the excellent day they had.

Miss Mildred Smith spent the week end in Edmonton.

Mr. and Mrs. Bruce McDougall are very happy over a baby girl which came to their home on May 24th.

The regular annual meeting of the Tennis Club was held on Thursday evening, May 23rd: Mr. Lutton was appointed president, Mr. McNeil, Secretary. A. Yokes, J. Mathew and A. Marby, grounds committee. The fees were set at one dollar per year. New tapes were ordered and the club expects to have a real good year as there are about twenty members and if they are all as active as we would like, a new court will have to be built.

Mrs. J. Bell of Innesville is spending this week with her daughter, Mrs. Laxton.

CAR OVERTURNS

Sedgewick, June 1.—When the car she was driving turned over twice after a collision with a tree.

Mrs. F. Dorman and six young girls who were in the car with her nearly suffered a serious accident near here. Although parts of the car were badly damaged, the occupants all escaped with minor injuries. The party was on its way to Wainwright, where the girls were to take part in a musical program. They proceeded to Wainwright, while Mrs. Dorman drove the damaged car, which is the property of Dorman and McCracken, back to Sedgewick. The other occupants of the car were, Victoria Parsons, Bertha Anderson, Marion Gammond, Willa Oaks, Bettie Clemens and Gwen Dorman.

HOW TO VOTE ON THE BEER LICENSE PLEBISCITE

NEXT WEDNESDAY

Do not use a cross, but mark the ballot with a single figure 1. For instance, if not in favor of beer licenses you would mark your ballot as follows:

Science in Service of Mankind

When the real story of human progress is told, probably the salient contribution credited to the present generation will be the alliance of science with pursuits of peace and the mobilization of scientific minds for the common good.

This generation, more than any previous generation in human history perhaps, has effected a divorce of science from war. In the past, the best scientific minds were directed to the chemistry and physics of warfare, industry and commerce for the most part having to content themselves with the second-best or rely upon adaptation of some invention or process originally devoted to war.

That is a broad generalization which, in the specific case may not be true, but which, in the main, can be substantiated; and the fact remains that war has been the great stimulus to scientific research and invention and, until the present generation, a greater stimulus than industry, commerce and the pursuits of peace. It might also be said that science in its first alliance with industry and commerce had a background of war—of economic war. Now, however, the science laboratory is a workshop, in the true sense of the word.

Illustrative of this idea is the little country of Denmark, where agriculture has reached a scientific plane higher than in any other country. The great stimulus to scientific agriculture in Denmark was war. Following the war with Germany, in which Denmark lost the provinces of Schleswig and Holstein, the Danes turned their attention to the intensive cultivation of their very limited resources recognizing that, only by high commercial development of these resources, could they hope to survive as a people, and Denmark as a nation. That they have succeeded is proved by the fact that agricultural countries now look to Denmark for leadership and guidance in certain advanced phases of agriculture.

The aeroplane, too, now occupying a supremely important role in the development of Canada's remoter areas and great mineral-bearing zones, and serving to "devour distances" which hitherto occupied weeks, sometimes months, of arduous and hazardous travel, made its greatest advancement during the hectic days of the World War. There was less material difference between the original Wright aeroplane, or the plane in which Beriot first crossed the English Channel, and the planes used in the early days of the war, than between the planes of 1914 and those which patrolled the front areas in the days immediately preceding the Armistice. That process of development which gathered so much impetus throughout the war, has been carried into this post-war period, a fact which is abundantly manifest.

The World War saw a general mobilization of science not only in Germany where, for some years previously, industrial research had been encouraged in that country's efforts to wage successful economic war against its rival neighbors, but also in and throughout the British Empire and the United States. There was no demobilization of the forces of science after the war in these countries. There was imperative need of retaining the best scientific minds available in the work of reconstruction, and of meeting competition in world trade. Science thus has come into its own.

Canada came late into the movement, but having entered, is now displaying the energy and enthusiasm characteristic of its youth and growing power. With agriculture as the basic industry of the country, it is natural that the mobilization of science in Canada should be directed in large measure to the advancement of that industry. Within this movement, the chemist has turned his attention to the milling qualities of wheat. The biologist is studying the theory of breeding crosses of the different kinds of wheat, the causes and remedies of plant diseases, the insect pests and their control. The physicist has begun to investigate soil temperatures and the engineer to consider power problems, water supply and waste in farm houses. The economists have concentrated on marketing problems, and so on.

Noteworthy already have been the achievements of the scientists at work in the Dominion Rust Research Laboratory, at Winnipeg. The progress already made toward the production of a rust-resistant wheat that will meet requirements as to milling and yield, have been so impressive as to presage an epoch-marking development in the near future.

Always Come Through

Call it luck, or national stamina, whatever you will, there is something about the British that pulls them through. They are paying more taxes than the average German, Frenchman and Italian put together; they have commitments all over the world, and they have a surplus population, with tremendous problems of employment and trade. Yet they never quail.

B.C. Onion Growers

The Vernon Fruit Union, which has closed its onion pool, is paying to growers \$46.61 net, including local rebates, for every ton of onions delivered to them on consignment during 1928. This price is recognized as particularly good. Hitherto \$34 to \$35 a ton has been deemed high.

Canadian Graphite

Canadian graphite is marketed as refined flake, the product of concentration of disseminated ore. The mines and mills are situated in the Perth, Bancroft and Carleton Place districts in Ontario, and in the Buckingham, Grenville, and St. Remi districts in Quebec.

Minard's Liniment for cuts and bruises.

Canada's Largest Organ Installation of the Royal York Hotel Casanova organ, the largest in the Dominion, has begun after months of preparation made for it. It was made in the world-famous workshops at St. Hyacinthe, Quebec, and its parts conveyed to Toronto in five railway cars.

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle three times daily with Nerville's. The antiseptic properties of Nerville quickly destroy the germs in the throat. Of course if the chest is sore Nerville should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerville will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerville and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

A Big Business

Postal Department in Canada Handles Millions Every Year
Rural routes have been extended and the inauguration of the air mail service has made it possible to deliver mail in the winter time to many isolated spots which have never before received mail during that season; thus bringing comfort to the people of the Magdalen Islands, the north shore of the St. Lawrence River, northern sections throughout the MacKenzie River district, Cold Lake, Flin Flon and north to the Yukon. The postal department has some 38,750 employees in the Dominion of Canada. Of these, between 12,000 and 13,000 are postmasters. The department handles resources of revenue somewhere in the neighborhood of \$50,000,000, approximately \$50 for every person in Canada in one year.

DO YOU VALUE HEALTH?

Sickness Almost Always Due To Weak, Watery Blood

If your health is poor; if you are pale, nervous and easily tired; if you suffer from heartache or backaches; if there are twinges of indigestion, or twinges of rheumatism, you may depend upon it that these symptoms stem from an impoverished condition of the blood, and that unless this condition is remedied a complete breakdown may follow. To any who are in this condition, Dr. Williams' Pink Pills will be found the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, frayed nerves. Men and women alike benefit through the use of this medicine. Therefore if you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrews, Halifax, N.S., who says: "My first experience with Dr. Williams' Pink Pills was as an ailing young girl, when they completely restored my health. Three years ago I became pale and run down, and my husband got a supply of the pills for me. I gave them a good trial and when my baby was born, she was a healthy baby and I did not have a day's sickness. My friends all told me how well I looked and contained that way, and I give all the credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine."

You can get the genuine return price drugist, or by mail at 50 cents a box from The Williams' Medicine Co., Brockville, Ont.

Farmers Will Grow Peas

Ambitious Planting Programme In The Taber Irrigation District

The other day a carload of dried peas, being 18 tons, arrived from Galatin Valley, Montana, for planting by Taber, Alta., irrigation farmers in the interests of the Bow River Canning Company, whose headquarters are in Edmonton and Vancouver. While pea gardens have been common in the district for many years the present planting programme is much more ambitious than anything in the past.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

False Economy

There are many people who would die of starvation rather than dig in to their savings, but we often see men who do not know how to enjoy their money. They save by denying themselves the natural pleasures of life and in the end are forced to leave their money to people who never helped to earn it.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Women Archaeologists

This archaeological season in Palestine shows a new feature of social interest. For the first time archaeological excavations are being carried on by a staff of women. This plan has been initiated by the British School of Archaeology, Jerusalem, which sent a party consisting of Miss Garrod, Miss Eubank, of Cambridge; Miss Kilson Clark, of Oxford, and one American woman to continue the work near Athlit, South Haifa. The direction is in charge of Miss Garrod.

Work joined with courage enables us to overcome all obstacles.

Neuralgia succumbs to Minard's Liniment.

Canadian Press Excursion

Newspaper Editors To Enjoy Extended Holiday In Europe

Newspaper editors from all over Canada who leave Montreal early next month for a two months' visit to England and the continent, when they return the visit paid to Canadian newspapers two years ago by the Newspaper Society of Great Britain, will be entertained royally wherever they go. Full plans for the visit, which is being organized by Rupert Davies, editor of the Kingston Whig-Standard, were announced recently, following his return from the meeting of the Canadian Daily Newspaper Association at which many of those who are going to Europe met.

Among the high spots of the visit, which, although entirely unofficial, will be of great benefit to Canada and to the prospects of increasing immigration, are a dinner to be tendered jointly by the Newspaper Society of Great Britain and the Empire Press Union in London, a gala performance at the State Opera House in Vienna and a garden party at which the president of Czechoslovakia will be the host.

There is to be much private entertainment with such hosts as Lord and Lady Astor, Lord Beaverbrook, Major John J. Astor, of The London Times, Col. Grant Morden, and Sir Richard Winfrey, who was one of the leaders of the British party which spent some months in Canada in 1927, and who will receive the Canadian editors at his home in Peterborough.

The complete itinerary commences with the sailing of the Canadian Pacific liner "Montrose" on Friday, June 6, and includes visits to France, Austria, Czechoslovakia, Germany, Belgium, Holland, Great Britain and Scotland. Five weeks will be spent on the other side of which three will be in Great Britain. The editors will return to Canada from Liverpool on the liner "Duchess of Atholl," reaching Montreal, July 26.

Origin Of National Anthem

Is One Musical Mystery Nobody Has Solved Yet

The origin of the British National Anthem is a musical mystery which has never been solved. It is known that it was first sung in public at the City of Coventry against the Jacobites, and the version given in the "Gentleman's Magazine" in 1745, makes it peculiarly applicable to the present day, though for a very different reason.

Simple and Sure—Dr. Thomas' Eucletic Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young and old.

Not An Affection

True Courtesy Is Outward Expression Of Sympathetic Nature

Many people regard the gracefully mannered man, distrustfully, and look with disfavor on displays of extreme politeness—and there certainly is a type of manner which repels because of its patent artificiality. But true courtesy is not an affection; it is the outward expression of a thoughtful and sympathetic nature. We cannot all achieve outstanding success in life; we cannot all perform great services for our fellow-men; but it is possible for the least of us to act graciously in our dealings with others—to behave beautifully in the ordinary affairs of every day. Let us then cultivate that "finest of the fine arts"—courtesy.

Cheapest Of All Oils—Considering the quality of Dr. Thomas' Eucletic Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Melting of the Antarctic ice cap, according to an Australian scientist, would raise the levels of the oceans by fifty feet.

No matter how deep-rooted the corn may be, it must yield to Holo-way's Corn Remover if used as directed.

An Imperial Airways liner covered the distance from London to Paris in 100 minutes.

Minard's Liniment relieves pain.

Toughness—durability—long-mileage—safety! That is what you want in tires. And you find them all in Firestones. The best non-skid tread ever put on a tire grips the slippery roads you travel at this season. Firestone tires give the greatest mileage, the greatest safety at the lowest cost per mile. See the Firestone Dealer today.

HAMILTON ONTARIO

The Wonders Of Chemistry

Will Be Used To Build and Change Character Is Prediction

The American Chemical Society, meeting at Columbus, Ohio, held out a few alluring prospects for the future.

For instance, the thing—many are coming when a man won't have to build his own character, but can depend on chemistry to do it for him.

Then persons owing cows, if they're fortunate enough to have a little woodland, will have the cow-d problem solved for all time because cows will eat wood.

Wood, chemically treated, is already being used for cow-fodder in some countries, according to C. L. Eschen, Boston chemical engineer, who addressed the society.

Dr. J. S. Matthews, of the University of Wisconsin, predicted that chemistry would be used to change and build character and in this connection he believes the insane will be made well and that the seasoned criminal will become a law-abiding citizen.

Future generations may be giants, one chemist said, if scientists can discover, by synthesis, the cause of growth which lies hidden in the cell nuclei. The discovery, he said he believed, would hinge upon the balance of atoms.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your drugist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

How many people do you know who are spending money they have not yet earned for things they don't need to impress people they don't like.

The prairie provinces with manufactured products during last year valued at \$227,000,000 begin to have tall chimneys of their own.

Another X-Ray Victim

French Doctor No Longer Able To Use Hands

Another specialist has been added to the list of X-ray victims. Dr. Sebastian Turcotte, of the Charite Hospital, Paris, has had to resign on account of injuries received. Since 1910 he has undergone a number of operations, and has lost several fingers, so that he is no longer able to use his hands for manipulating the X-ray apparatus. For 30 years Dr. Turcotte has been associated with the development of the X-ray treatment, and, although suffering ill-effects, has shown great devotion.

Could Hardly Live For Asthma, writes one man who after years of suffering, has found complete relief through Dr. J. D. Kellough's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

May Make Polar Trip

Grat Zeppelin Likely To Make Expedition Next Year

In addition to being groomed for a round-the-world trip this summer, the Graf Zeppelin is destined to show its silver sides to the white waste lands of the Arctic before another year has passed. The International for the Exploration of the Arctic Regions by means of aircraft, has entered into a contract for the use of the big ship for an expedition from Leningrad to either Nome or Fairbanks by way of North Polar regions. The trip will take place in April or May of 1930.

A new laboratory in Berlin, Germany, is equipped to produce temperatures as low as 452 degrees below zero, or about 8 points from absolute zero.

HELP WANTED
Earn upwards of \$25 weekly growing Mushrooms for us in cell or other waste space. Deliver to our nearest branch. Light pleasant work for either sex. Illustrated booklet sent anywhere, for stamp.

Highly Interesting Developments Are Expected In Canada As A Result Of Fuel Research Work

Fuel research may not sound like an entrancing subject, but to materially increase the wealth which Canada will receive from her enormous coal deposits through the scientific and most economic use of the coal is something that does make an appeal. The successful coaling of coal means an improved fuel product and less dependence on imported fuel. Our coal deposits are the potential source of an unlimited supply of crude oil, in case the crude oil from wells, though now rapidly increasing, may not always be plentiful. The uses of gas made from coal are also increasing.

These and other matters are dealt with by R. E. Gilmore, superintendent of the Fuel Research laboratories of the Mines branch at Ottawa, in the bulletin of the Professional Institute of the Civil Service. The problem of coaling, he says, is not merely one of finding the way to coke different Canadian coals but of finding the coals which will produce a coke that is equal in every way to the best that is imported.

Coke is now produced in Canada mostly by high temperature carbonization. That is, the coal is brought to a large centre where there is a good market for the gas that is driven off during the process. But low temperature carbonization, which does not involve disposal of the gas and can therefore take place at the mine, promises a greater utilization of Canadian coal, according to Mr. Gilmore. But low temperature processes differ in detail for different varieties of coal, and this provides plenty of room for research.

Highly interesting developments are evidently possible in the use of gas made from coal. Mr. Gilmore says: "More and more city houses are being heated with gas. We have refrigerators operated by gas as well as electricity so that it is now possible to produce both heat and cold in the same room from the city gas supply. Gasoline can be made synthetically from coal and gas and, imagine, if you will, the possibilities of the development of a process on a small unit scale so that synthetic motor fuels may be produced in private homes and other buildings served with gas. Future developments along this line may make it possible to obtain the motor fuel supply for the family car from the city gas supply, thus converting private garages into private filling stations."

Besides the coke, oil and gas, many other valuable by-products can be taken from coal. The possibilities of fuel research are indeed wonderful. Some of the benefits should be obtained very soon, and others will be a matter of the future. The coal resources will mean very much more to the country if their value can be enhanced, as is suggested by the use of scientific methods.—Free Press.

Had Good Year

Favorable Report On Sheep and Wool Industry In Canada

For both meat and wool the sheep industry of Canada had a very good 1928. A report of the Dominion Department of Agriculture says sheep and lamb sales for last year were better than \$1 per hundredweight over those of the preceding 12 months, while the wool sales for 1928 showed an increase in values of from 5 to 25 per cent. With a total of 469,712 head the stockyard sales increased by approximately 5,000 head. An appreciable expansion in the industry is reported, with notable gains in Ontario and the four western provinces.

The debt a man owes himself is never outlived.

"I know I shall enjoy the conference tomorrow."
"?????"
"I shall not be there, but my wife and mother-in-law will."—Esquella, Barcelona.

Export Wheat To 47 Countries

British Isles the Principal Buyer For Canada's Supplies

Value of exports of wheat from Canada for the first eight months of the current crop year ended March 31, 1929, totalled \$30,277,524, an increase of about \$50,000,000 over the corresponding period in the previous year. The British Isles was the principal buyer, taking \$17,411,325 worth. Wheat from Canada is exported to 47 countries of the world. Total wheat flour exports for the eight months under review were valued at \$46,314,250 as compared with \$43,457,802 for the corresponding period of the preceding year. Of this amount the British Isles took \$10,955,857, and other countries took \$35,342,702.

Planes For Flying Clubs

Government To Present Ten New Planes To Encourage Flying

Ten aeroplanes are to be given by the government to flying clubs already in operation. These are to duplicate purchases made in 1928 by the following clubs: Montreal, Ottawa, Hamilton, Toronto, Winnipeg, Regina, Moose Jaw, Granby, Quebec, Saskatoon and Calgary.

The grants are made in furtherance of a policy formulated in 1927 to encourage flying in Canada. There are at present attached to the clubs 142 holders of private licences and 45 commercial. Total membership is 2,400 with 200 members flying solo.

A DELIGHTFUL FLARE

A modernistic print in silk crepe with plain crepe in deepest tone used for applied band to outline modern line of bodice. The scallops of hip yoke that dips its side, uses the lightest shade of print in plain crepe for binding. The skirt is straight and slender at back with flared fullness across front. Style No. 465 can be had in sizes 16, 18, 20 years, 36, 38 40 and 42 inches bust, and is smart to wear with straight-line coat to complete ensemble. Flowered chiffon, georgette crepe in tomato red, black silk crepe with eggshell trim, lining. Lelong blue canton-faille crepe, printed rajah silk, and featherweight tweed in check pattern in wood-violet tones are smartly appropriate for immediate wear. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles and cute designs for the kiddies.

Tiniest Tagger Is Red Cross Champion

Charming little Lenore, Moir, of Edmonton, Alberta, had the distinction of raising most money for the Junior Red Cross Crippled Children's Hospital when the Annual Primrose Tag Day was held in the city. Twenty-five thousand beautiful primroses were made in April by the children in the city, and offered for sale by hundreds of taggers, young and old. Of these Lenore in her Red Cross uniform attracted much attention, and the "Little Nurse" had the honour of turning in the best box of money and winning first prize.

One thousand dollars were collected for the crippled children of Alberta, on an April morning when the streets of the city were transformed to a garden of primroses that is forever England.

Adventurers Remembered

Table Erected In London To Memory Of Early American Settlers

A handsome bronze tablet was recently placed in a prominent position at Brunswick Wharf, Blackwall, London, to the memory of 105 "Adventurers" who set sail from that spot on December 10, 1606, to found the first permanent English colony in America.

Three ships, comprising the expedition, the largest, as recorded on the table being the "Sarah Constant," of 100 tons. The remaining two, the "Goodspeed" and the "Discovery," were respectively 45 tons and 20 tons.

On May 13, the adventurers settled where now is Jamestown, Virginia, but owing to the climatic conditions, lack of food, and the hostility of the Indians, 63 of the original 105 died during the first seven months. The handful of survivors, however, carried on, and 15 years later the little colony numbered 5,000 souls.

A really dependable market tip—aspargus.

SCENE OF R.C.G.A. AMATEUR

No. 1 Hole—385 yards, Par 4.

Jasper, Alberta, will be the venue of the Canadian Amateur Championships of the Royal Canadian Golf Association, August 19th to 24th, this year. The Jasper Park Lodge course, par of 72 has not yet been made by an amateur player, and many reputations are likely to be shattered in the tournament this summer. It is expected that the course, which has been described by experts as the finest on the continent, will attract many of the outstanding players of North America.

The photograph shows the first hole of the Jasper Park Lodge course as seen from the tee. Below is a plan of the first hole with the yardages to scale marked below it. Practically every hole has three tees, but in the amateur championships all play will be from tee No. 1.

Co-incident with the Canadian Amateur Tournament, the Western Canada Amateur will also be played over the Jasper Park Lodge course.

Summer Fallow Treatment For Wheat

Weeds Should Be Destroyed As Soon As Possible After Germination

The most important item in summer fallowing is to germinate weed seeds and destroy the weeds before they have consumed any appreciable amount of moisture.

This is the view held by the superintendent of the Swift Current experimental station, after five years work in treating summer fallow in different ways. Fall ploughing has not proved a help. Indeed it has given lower average yields than any other treatment. Cultivation only during the fallow year gave the best average results for five years, amounting to 26.4 bushels of wheat the year following as compared with 22.9 bushels when the land was fall ploughed previous to the fallow year and cultivated the following season. Discussing this question in his report for 1928, published by the Department of Agriculture, at Ottawa, Mr. J. G. Taggart, the superintendent, calls attention to the importance of leaving the soil in the fall in a condition that will not promote soil drifting.

London Is Changing

But Many People Would Prefer City As It Was

London is dying under our eyes, and not elegantly to slow music, but in violent spasms. Districts change their very character. In Bloomsbury Square, in Mornington Crescent, on the Embankment, in Westminster huge new buildings proclaim the dominion of industry and science. This age found London brick and stucco; it will leave it stone and steel, and concrete, and glass, and tiles, and architects anticipate that soon there will be less stone and more steel and glass. It would be cowardly to doubt that London will then be a very fine place—almost as fine as New York; but some people will still think it worth while to have known, and not from photographs only, the London of Queen Victoria.

Unsuitable For Canada

Dominion Agrologist Issues Statement About Red Alfalfa

"Hardiness is one of the prime requisites of alfalfa in Canada. The planting of seed from a region known to produce a type of alfalfa unsuitable for Canadian conditions is to invite disaster," says G. R. McQuestie, Dominion Agrologist, who adds: "We are informed that there has been lately imported into Ontario two substantial shipments of Argentine alfalfa seed. Numerous tests in many parts of Canada have proven this seed unsuitable for our use. This Argentine seed is required by law to be stained red to an extent of ten per cent. For your own protection, beware of all alfalfa seed carrying red stain."

Value Of Personal Contact Is Daily Demonstrated At League Of Nations Gatherings

Telephone For Moving Train

Canadian National Railways Introduced Novel Equipment

A chapter unique in railway history and one which for its importance and far reaching effects, has probably never been equalled, was written by the Canadian National Railways, when a special train, operating under the personal direction of Vice-President W. D. Robb in charge of the telegraph and telephone department, demonstrated the feasibility of telephone communication to and from a moving train with the same simplicity of operation as a subscriber would use in making a long distance phone call.

Apart from this achievement, one that railways of the world have vainly searched for some years and which the German State Railways imperfectly obtained by the use of a one way transmission, an additional dramatic touch was given when unexpectedly the voice of Mr. Robb was heard in the two adjoining radio equipped cars plainly talking through the loud speaker. The solution to this seeming mystery was that the station CNRT, the Canadian National Railways, broadcasting station, at Toronto, was broadcasting, a special Sunday afternoon program at the time and as Mr. Robb spoke from the moving train through his telephone he was connected with the studio and at once put on the air. Despite the fact that the train was travelling at a speed of about twenty miles an hour, and that his words had to be transmitted to Toronto and returned again to the train, the reception was perfect, and he was heard as clearly as if he had sat before the microphone at the studio.

"This is a new feature in the history of radio development," said Mr. Robb, "and a further evidence of the enterprise of the Canadian National Railways in their continued efforts to give every possible convenience and pleasure to patrons making use of the National system. We were the first railway to equip trains with receiving sets for the entertainment of our passengers and now we are about to embark on a new enterprise in the way of affording telephone facilities. In the past a traveller, when on the train, was isolated from oral communication with home and office. This handicap to the business man and others we purpose to remove."

During the course of the demonstration the first telegram to be received by telephone on a moving train was read to Mr. Robb. It was from Sir Henry Thornton, chairman and president, and was as follows: "Heartiest congratulations upon the success of experiment. Will revolutionize communication on moving trains. Please thank all concerned for their splendid effort."

Apart from the scientific and practical value as demonstrated by the test, an usual testimonial was forwarded to Sir Henry Thornton by the various representatives of the press on board the demonstration train. This read "undersigned representatives of the press of the United States and Canada congratulate you on the successful consummation of a new and miraculous development in the two way telephone communications from a moving train to points within the Dominion."

The scientific achievement will mark a further step, not only in a commercial way but in the development of news from those travelling across the country. Hereafter we may expect interviews enroute with prominent personages instead of waiting until they arrive at some terminal.

Not A Modern Idea

Custard, it appears, had its place in comedy as far back as the Middle Ages, for it is related that one of the feasts the Lord Mayor of London's fool was bound by his office to perform on Lord Mayor's day was to leap, clothes and all, into a huge bowl of custard, says the Detroit News. This was considered funny and pleased the lower class of spectators, who never seemed to tire of its yearly repetition. Shakespeare refers to this performance in "All's Well That Ends Well."

Florini: "How come, Rastus, dat 'buck' means 'money'?"
Rastus: "Easy! Any fool celled man knows dat 'Buck' goes wit' 'doe!'"

"That man must know all about the stock exchange."
"What makes you think so?"
"He never speculates."

Anyone who has visited Geneva, the home of the League of Nations, has been impressed above all with the friendly spirit which seems to prevail in this world meeting place. No greater indication of the value of personal contact between the representatives of different peoples can be found than in Geneva. There, even that great jargon, the color line, seems to be forgotten, and white, brown and black mingle on terms of apparent social and international equality.

Senator Dandurand has said that if the League did nothing more than gather together the representatives of 54 nations for a friendly and commonsense discussion of their differences it more than justified its existence. More and more each year this is brought home to the visitor and today this lovely old town on the loveliest lake in the world is the friendliest and most cosmopolitan spot in Christendom.

Geneva has lived up to a lot since the early days of the League. There were only council meetings and the annual assembly. But now the League besides trying to settle questions of peace and war has got very busy on other humanitarian issues which in the aggregate help nations to understand one another. Every week delegates and experts from all the countries of the world turn up to debate under League auspices such subjects as calendar reform, the opium and white slave traffic, international trade barriers and the betterment of the position of working classes.

At assembly time, of course, Geneva is filled to bursting point with people of every race and colour. You hear samples of most of the languages on earth, and the points of view of every race and nation. The Great Hall of the League building gets so full of delegates that a few members of the public can barely squeeze in. There is an enormous confusion of delegates, experts, visitors, and "big guns." But somehow things get done. Those efficient levers on the secretariat sort things out, and transmit decisions and enquiries to seats of government all over the planet.

More interesting than the League's official halls are the hotels where the men who matter get together over dinner and lunch tables to grind axes, exchange views, reach understandings. You see the orator, Vimali, the very black delegate from Haiti trying his French on the bland yellow representative of China, "Ranjit" who is so often at Geneva on India's behalf, trying over a friendly dinner table to get Prince Charming, the Persian legation, to come round to his point of view about opium growing in Persia.

Truly, everyone who goes to Europe should visit Geneva. There they will see in being the beginnings of the first practical effort to bring universal peace into the world and they cannot but be impressed with the fact that those who assemble there are going about the job in a wholehearted, and business-like manner.

Alberta Turkeys

According to a booklet issued by the Provincial Government's Department of Agriculture, during the year 1928, some 1,350,000 lbs. of Alberta turkeys were disposed of outside the province, although ten years ago it was necessary to import large supplies from Eastern Canada. Now there is a large surplus for shipment to Eastern Canada.

The Wastebasket

Heard at the poker party: "How can that little birthday gift for your wife be a surprise if she told you what she wanted?" "I'm not going to give it to her."

"Spring is the time for love," said a young fellow at the dance here. "Well, it's not so bad during the other season's either," responded his best girl.

At last it has been discovered why Viking girls are so sweet. Psychologists say that excitement causes more sugar in the blood.

"We had a nice bridge game this afternoon," said a local lady to her husband the other evening. "That so? who won the argument?" he replied.

Heard among the girls at the dance: "Is that Irma fellow unsophisticated?" "I'll say he is. Why he thinks that six people can't ride in a Ford coupe."

"I lost control of my car," said a young fellow Monday at the post-office lobby. "Have a smash up?" he was asked. "No," he replied. "I missed four payments and the dealer took it back."

"I notice the girls here have a very fresh complexion," remarked a man in town yesterday. "Yes, fresh every day," replied a bystander.

"Isn't that a perfectly marvelous step that Bruce fellow has got," said one girl to another at the barn dance last week. "Sh-sh-sh," the other cautioned, "he's got St. Vitus dance."

Heard in justice court: Lawyer, after cross examining lady witness: "I hope I haven't troubled you with all these questions?" "Not at all," she replied. "I have a small boy of six at home."

"And if the wolf of poverty comes to our door we will face it together," said a high school girl poetically to her new fellow. "Ah, dearest," he replied, "the sight of your dear face would drive him away." And he is now wondering why the spring atmosphere remains so chilly.

"Why, daughter," said a Holden lady coming home at 2 a.m. the other evening, "you should not have waited up for me." "I know, mother," the girl replied, "but somebody has to let grandma in."

Heard among the girls at the dance: "Bill asked me for a kiss last night." "What did you say?" "Same old thing." "What did he do?" "Same old thing."

"Why not give your time to the missions?" suggested a local minister to a little girl when her parents handed her a dime, and she said she was going to get an ice cream soda with it. "I thought about that," the little girl replied, "but I think I'll buy the ice cream soda and let the storekeeper give it to the missions."

A careful observer says that a girl isn't really an old maid until she begins to get mad about it.

"Marriage is like a mouse trap, says a careful observer, easy to get into, hard to get out of, and the husband is usually nothing but a piece of cheese."

NEW POOL ELEVATORS

Between March 22nd and May 6th this year the Alberta Wheat Pool has purchased 22 local elevators and has 41 new elevators under construction. The new elevators being built are 35,000 and 40,000 bushels capacity, and the majority of those purchased are of 30,000 bushels capacity. The addition of these houses brings the total elevators owned by the Alberta Pool to 381.

Elevators have been purchased at the following points: Acheson, Bardo, Bassano, Boyle, Cavendish, Chigwell, Coutts, Haynes, Hazelidine, Lacombe, Lousana, Midnapore, Oberline, Orpion, Sabine, Spring Coules, Spruce Grove, Stobart, Warspite, Whitelaw, Whitta, Villeneuve.

Elevators are being built at the following points: Alix, Athabasca, Balzac, Barnwell, Bennett, Bittern Lake, Brooks, Broxburn, Buoyant, Clandonald, Coalhurst, Colinton, Conrich, Cowley, Charboneau, Delacour, Diamond City, Dimadale, Dinant, Grainger, Grantham, Hay Lakes, Indus, Langley, Lea, Hurst, Lyalta, Mirror, Morinville, Nevis, Pearce, Pibroch, Baley, River Bend, Rosebud, Rosemary, St. Albert, Strangmuir, Two Hills, Waskatenau, Wells, Vimy.

Bout Called
Off Until
June 21

(From the Viking News)

The big boxing programme to be held here June 7th, has had to be postponed until June 21st because Curly Kid Archibald, of Irma, one of the principals in the main bout, injured his hand in a boxing match at Loughheed Friday night. Called over the phone on Monday, he said that he would be in shape to be here on June 21st. The local committee held a meeting and decided that in the best interests of everybody who wanted to see this match, that the program be called off until June 21st. All tickets sold will be good for that day.

All fans will please take notice of the change in date and pass the word along to others.

The Viking horsehoe pitchers now have a real organization and are going strong. At a meeting held Monday evening Angus Ross was elected president, J. L. Slavik, vice-president, and A. Kaster, secretary-treasurer. Several new pairs of regulation shoes have been ordered and will be here for the tournament today, Wednesday.

The baseball fans and players met in the town hall last Thursday evening and organized for the season. J. L. Slavik was elected manager and Dr. Richardson, captain. The Elks have loaned the team their uniforms and equipment, outside of that the team will finance themselves. Games are being arranged.

The first game of the season will be played at the local fair grounds on Sunday, June 9th, at 3 p.m., when Holden will be down in full force.

A special sitting of district court was held here on Thursday last when Judge Taylor presided. The case tried was a technical charge of bribery under the provisions of the M. D. Act against Harry Albionson laid by Wm. Dorin, a resident of Iron Creek Municipal district. Mr. Albionson was found guilty and his right to vote for two years, and hold office for four years has been withheld.

The employees of the gas company at this point are assisting in the share selling campaign now on until Saturday of this week. Shares at par value of \$100.00 are selling for \$96.00, yielding the attractive interest of 6-1-4 p.c. The funds will be used for promotion work by the company.

Charles and Frank Dakin were recent arrivals in our community and visited at Simon Place's. Both Charles and Frank have just spent a month and a half at the Flin Flon mines in northern Manitoba but did not think much of conditions there. Charles has now found employment near town and Frank has gone to Edmonton to seek employment.

The Irma Sports to be held on June 12th will no doubt draw a large crowd from this district. The Viking band has been engaged for their first engagement this year, and it is likely that the newly organized baseball team will be entered in the tournament. Let's go. It's a half-holiday.

The first block of the new cement walks were laid early Monday morning. Work is progressing very rapidly at the north end of Main street. This portion of the street will also be graded and properly drained.

Angus Ross and Jas. Hennessy were winners of the local horsehoe tournament at the fair grounds last Thursday evening. Another is being held on Wednesday of this week. Several pairs of new regulation horsehoes have been ordered.

Bert Kinghorn and George Ross are going to spend the summer at Watereys, Athabasca Lake, fishing. Arthur Smith acted as chauffeur as far as Abe, 70 miles north of Edmonton. Arthur will spend a few days in that district with friends before returning to his farm south of Viking.

The Village of Irma are holding a vote near school on Wednesday, June 12th. Coming on the same day as the sports, there should be excitement enough to suit everybody.

McAthey & Jones are installing a new unit to their electric power plant and erecting a separate fire proof building to house their equipment.

The new Red & White chain store owned and operated by K. A. Hardy opened its doors to the public last Thursday and has been well patronized by the buying public. Being a rather new venture in town it is in the nature of an experiment and will be watched with interest. It is the first chain store to be established in this community.

Messrs. C. A. Dupre, Tom Hoskins Dave Dorewood, Glen and Fred Demold attended the boxing match at Loughheed Friday evening.

A number from here attended the sports at Jarow on Monday and report a very fine outing.

LABOR NEEDS 21 SEATS TO
CONTROL BRITISH COMMONS

The standing of the British parties now is as follows:

Labor	287
Conservatives	253
Liberals	54
Independents	4
Nationalists	3
Prohibitionists	1

Total 602

Labor is 21 seats short of a clear majority.

ALBERTA FARM LOAN BOARD
NAMED

The personnel of the Alberta Farm Loan Board as nominated by the provincial government and accepted by the Federal Farm Loan Board at Ottawa will include J. C. Murray of Edmonton, A. H. Tovell of Calgary and George Bennett of Mannville. Hon. R. G. Reid, Provincial Treasurer, in making this announcement expresses the belief that the government has secured a highly efficient board to which may safely be entrusted the administration of the new Act in this province. Mr. Murray, the chief executive officer of the board has been until recently a member of the Edmonton staff of Credit Foncier. He will give his full time to the farm loan work, his associate members being available for such time and service as may be required. Mr. Tovell is chairman of the Municipal Hall Insurance Board and Mr. Bennett is a well-known director of the Alberta Wheat Pool. Steps will be taken at an early date towards bringing the new Act into operation in Alberta and a number of applications and inquiries already in hand respecting farm loans will be dealt with as soon as possible.

UTILITY INDUSTRY IS
TRUSTEESHIP INSTEAD OF
TRUST, SAYS FOGG

Those who have attacked the public utility as a "trust", now find the ground suddenly taken from their feet by the sudden realization that this "trust" is really a trusteeship of millions of wage earners, families and business men in every section of the country, Oscar H. Fogg, of New York, president of the American Gas Association, declares.

Professional detractors charge the public utility with the crime of being big, according to Mr. Fogg, who says that the industry of today is big, and properly so, because it rests on a base of almost universal service. Under such circumstances, he states, great size is not an achievement in itself, but rather a manifestation of the intimate relation between utility service and the prosperity and progress of the nation.

"The most reliable estimates available show that during the last ten years the number of stockholders of public utility companies alone have been increased by hundreds of thousands of individuals," Mr. Fogg says. "This does not take into consideration billions of dollars of public utility stocks and bonds owned by life insurance companies, savings banks and other guardians of the people's funds."

"Positions of power and preference may be won by favor, but there is only one thing that makes an investor and that is confidence."

"The people can be trusted to look after their own interests, when they know where those interests lie. Twenty years ago the average man gave little thought to his gas or electric service except as he hoped to reduce his monthly bills. Today he is an investor, and as a writer in the New York Times recently expressed it, 'The butcher, the baker and the candlestick maker are beginning to bring critical analysis to bear on the views of agitators against corporations, however small portions of interest in them may be.'"

"This idea is well summed up in the words of a recent editor in the Philadelphia Bulletin, which states that 'The people of the United States in 1929 are not fearful of Big Business. It cannot even be said that they are prejudiced against it. They have become better acquainted with it. By tens of thousands they are each year becoming stock holders in it. This popular stock ownership has had a distinct influence on the attitude of the public toward the big corporations and also on that of the big corporations toward the public.'"

"The public will do its share, if we do ours and see that it has full and accurate information about the problems, aims and progress of our business."

KEEN INTEREST SHOWN
IN TURKEY RAISING

Greatly increased interest in turkey raising as a profitable sideline to general farming operations is reported throughout the province. Still further expansion is anticipated judging from the number of inquiries received by the poultry branch of the Department of Agriculture for the recent publication "Turkey Breeding and Management" which is a free bulletin available for distribution.

VILLAGE OF IRMA, IRMA, ALTA.

BY-LAW NO. 18.

RESTRAINING ANIMALS
RUNNING AT LARGE

The Council of the Village of Irma, Alberta, enacts as follows:

(1) A. In this by-law unless the context otherwise requires, Animal means any head of cattle, horse, sheep, goat, swine or poultry.

B. Cattle—Means any Bull, Cow, Ox, Heifer, Steer or Calf.

C. Horse—Means any horse, mare, gelding, colt, filly, ass or mule.

D. Sheep—Means any ram, ewe, wether or lamb.

E. At Large without being under the control of the owner or possessor either by being securely tethered or in direct and continuous charge of a herder or by confinement within any building, fence or other enclosure.

(2) It shall not be lawful to allow any animal to run at large at any time of the year within the limits of the Village of Irma.

(3) Any animal found at large or trespassing upon any lands or premises enclosed by a lawful fence, contrary to the provisions of this by-law shall be liable to be impounded and sold according to the provisions of this By-law unless the damages, expenses and fees be sooner paid.

(4) Nothing in this By-law shall prevent any person from waiving his rights under this By-law and taking action to recover compensation in any court of competent jurisdiction from any person owning or having the custody of any animal through which damage has been caused contrary to the provisions of the By-law.

(5) There shall be established in the Village of Irma a public pound and a pound keeper appointed for said pound, his remuneration to be such fees and charges as he shall be entitled to under the provisions of the Domestic Animals Act, 1923.

(6) The said pound shall be for the impounding of animals at large or trespassing contrary to the provisions of this or any other By-law of the Village of Irma, which said impounding may be done by any other person than the Poundkeeper.

(7) Whenever any animal is impounded it shall be the duty of the poundkeeper to retain same until the owner or owners thereof shall have paid the fees and damages if any claimed for the trespass.

(8) When any animal has been confined or detained by any person under the provisions of this By-law for the purpose of impounding, the same if the owner of the animal or some person in his behalf pay or tender to the person seizing or having charge of such animal before same has been actually impounded the charge for which the said animal has then become liable under this By-law, the person having charge of such animal shall forthwith deliver up the same to the owner or the person tendering the said charges on his behalf.

(9) Nothing contained in this By-law shall deprive the owner of any impounded animal of any action, remedy or right that he may have at common law or otherwise by reason of the same being unlawfully seized, detained or impounded.

(10) Any person who leaves open any gate or lets down any bars or makes a gap in any fence for the purpose of permitting any animal to trespass or who otherwise causes any other animal to trespass shall be guilty of an infraction of this By-law.

(11) Any person claiming any damage for trespass by any animal impounded may at any time before the animal is released deliver to the poundkeeper a statement in writing showing the amount of his demand.

(12) Any person or persons found guilty of a breach of this By-law shall upon summary conviction forfeit and pay a penalty not exceeding \$100 and costs for every offence and on default of payment thereof it shall be lawful for the Justice so convicting to sentence the offender or offenders to imprisonment in the nearest common goal with or without hard labor for a period not exceeding 30 days unless the said penalty and costs including the costs of the commitment be paid sooner.

ECZEMA CAUSED MUCH PAIN

On Fingers. Lasted Ten Years. Cuticura Healed.

"When I was two years old eczema broke out in a rash between my fingers and caused much pain. My fingers were swollen and inflamed. The itching and burning caused me to scratch, which made it worse. I lost sleep on account of it.

"The trouble lasted about ten years before we began using Cuticura Soap and Ointment. After one week's use it looked better, and after using three cakes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." (Signed) Miss Ellen Cavanaugh, Enterprise, Ont., June 3, 1929.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Get Cuticura Soap and Ointment at any drug store. Sold everywhere. A 7¢ box of Cuticura Soap and a 25¢ box of Cuticura Ointment make a complete skin cure.

WORLD HAPPENINGS BRIEFLY TOLD

Plans for increasing the capacity of the Alberta Wheat Pool elevator No. 1, at Vancouver, by 250,000 bushels, giving the plant a storage of 4,700,000 bushels have been completed.

President Paul von Hindenburg, Germany's soldier-statesman, will retire from public life at the expiration of his present term of office in 1932 and spend the remainder of his days on his country estate in Hanover.

Mrs. Ernst Vierkoetter, wife of the well-known marathon swimmer, will enter the 10-mile event of the Winnipeg marathon at the Canadian National Exhibition if she is able to get into condition. She was formerly Germany's woman long distance endurance swimmer.

Refused of the U.S. supreme court to review its recent decision on the committing of British subjects and naturalized citizens of Canada means that only native born residents of Canada will be permitted to continue to that country for employment.

The H.M.C.S. Patriot, a destroyer presented to Canada by Great Britain following the war, has been sold to a British ship breaking company and it is understood will be towed to England shortly for scrapping. Her propellers have been removed at a Halifax dry dock.

A request will be made to the Canadian government by the United States for information concerning the seizure of five United States fishing vessels in Canada's Goose Island harbor, British Columbia, for alleged violation of the fishing treaty between the two countries.

The Department of National Defence know nothing whatever of any new explosive having been invented at Patuxent artillery camp, nor is the department conducting any experiments in connection with such explosives, was the official declaration issued from the department at Ottawa.

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work. I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."

C.P.R. Branch Lines

Heavy Programme Of Extension For The Season Of 1929

Under its policy of development and expansion, the Canadian Pacific Railway has already this season let contracts for 280 miles of branch line construction in Western Canada, according to D. C. Coleman, vice-president, western lines. This figure was reached following the announcement of four additional contracts totalling 112 miles, and it is expected that when the contracts for the newly authorized Lagan-Prince Albert branch are let, that the construction programme for the season of 1929 will call for slightly more than 400 miles. Work on these contracts will be commenced immediately.

Contracts announced follow: Nipawin toward Prince Albert, 23 miles; contractor F. Mannix, of Calgary.

Kootenay Landing to Procter, 35 miles; contractor Dutton and Grant, of Winnipeg.

Archives to Wynmark branch from Lake Johnson to Wynmark, 27 miles; contractors Riley, Reid and Sanderson, of Edmonton.

Surrey to Riverview, branch from Arrowwood to Riverview, 23 miles; contractor Tomlinson Construction Co., Ltd., of Winnipeg.

Contracts already given this spring and which call for 174 miles of construction follow: Aeneas, northwesterly, 25 miles; contractor, F. Mannix, of Calgary.

Willingdon to Vegreville, 25 miles; Brooks Construction Co., Prince Albert.

Lake Ahna, west, 35 miles; contractors, Riley, Reid and Sanderson, of Edmonton.

Lloydminster, northwesterly, 25 miles; contractors, Ross, and Wickert, of Winnipeg.

Twain westward, 20 miles; contractors, Ross and Wickert.

Coronation, Yegrean, 43 miles; contractor, F. Mannix, of Calgary.

This company will be provided with the Lagan-Prince Albert branch, northwesterly, 25 miles; contractors, Stewart & Cameron, of Winnipeg, are the contractors.

In making the announcement Mr. Coleman stated that the C.P.R. had recently been received to the legislation authorizing the construction of the branch line from Lagan to Prince Albert, and that it was proposed to let contracts for this work at the earliest possible moment, and immediately following the acceptance of the plans by the Board of Railway Commissioners, at Ottawa.

This line will be 117 miles in length and will form an important link in the western branch line system. The programme, Mr. Coleman said, indicated that the Canadian Pacific Railway was proceeding actively with its projected branch lines and, further, that it was going ahead with its plans for the opening of the northern country. This was particularly emphasized by the letting of the contract to build the Nipawin toward Prince Albert, and by the fact that during the winter the company devoted a great deal of energy to the construction of a combined highway and railroad bridge over the Saskatchewan River at Nipawin. The piers for his bridge are now in place, he stated, and the structure will be completed as soon as possible. Since the company's interest in northern development was further indicated by the announcement that the Lagan-Prince Albert branch would be proceeded with this season. Another important line was that scheduled from Kootenay Landing to Procter in British Columbia. This line when completed will give an all rail southern route connecting link, was made necessary by the growth of traffic and will do away with the necessity of using boats on Kootenay Lake. The construction work itself will be one of the most difficult since early construction days in Western Canada as the line will be built through mountainous country. It will be necessary to put in two tunnels, one 400 feet and the other 1,000 feet, and one bridge over the Kootenay Lake at Kootenay Landing which with approaches will be 3,500 feet in length.

The branch lines on the prairies will, he stated, prove of immense value to the agricultural communities and will greatly facilitate the movement of grain to markets and manufactured commodities of the farmers and distributing centres.

Negotiations with the Canadian National Railways are proceeding effecting the entrance of the Canadian Pacific Railway to Battleford and North Battleford, and negotiations for an exit for the Canadian Pacific Railway from Prince Albert northwesterly will shortly be undertaken.

Ship Muskies To England

What is stated to be a record consignment of muskrats in one batch to the Old Country was shipped on April 16th on Lindsay to South-on-Sea, England, in the cargo of the Canadian Pacific Express Company. The rodents are to form the nucleus of another muskrat farm in England, where the industry is thriving under an increasing demand for furs.

Attitude Of Banff

Banff, the headquarters of Banff National park, Alberta, has an altitude of 4,534 feet above sea level and enjoys a climate which is in many respects, ideal. The air is exceedingly pure and has a most exhilarating effect.

Traffic Cop: Don't you know you can't turn around in the middle of the block?

Fair Lady: Oh, officer, I think I can make it. Just watch.

Recipes For This Week

(By Betty Barclay)

THREE-IN-ONE RECIPE

Lemon Gelatine

1 tablespoon granulated gelatine.

2 tablespoons cold water.

1 1/2 cups boiling water.

1 cup sugar.

1 cup lemon juice.

Soak gelatine in cold water 5 minutes; add boiling water, sugar, salt and lemon juice. Turn into cold mold and chill.

Lemon Sponge

For Lemon Sponge, when jelly begins to stiffen, beat with egg-beater until light and frothy.

Lemon Snow

For Lemon Snow, add to lemon sponge the stiffly-beaten whites of 2 eggs.

CORN SOUP

1 medium can corn.

1 cup boiling water.

1 slice onion.

1 teaspoon salt.

Few grains pepper.

2 cups milk.

2 tablespoons flour.

2 tablespoons butter.

Rinse can with boiling water and add to corn and onion. Simmer 20 minutes. Rub through a sieve. Add mixture to 2 cups thin cream sauce (2 cups milk, 2 tablespoons flour, 2 tablespoons butter). Season and serve hot.

Naming Our Highways

Continued progress has been made in the naming and numbering of motor roads in Canada and in the erection of uniform direction and warning signs and danger signals. Interprovincial conferences have been held for the purpose of standardizing signs, signals, and other highway devices throughout the Dominion.

Old Clock Still Going

Among the possessions of Mrs. Emily J. Conaghan, Columbus, Ohio, is an old wall clock which she says has ticked every hour of her life. She said the clock is 60 years old, four years her senior, and has never failed to keep correct time.

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes:—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct for receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Developed Whaling Industry

Success Has Followed Exploration Of Arctic and Antarctic

The life of the arctic explorer and the whaler is one of adventure and also of great hardship. The adventures which are so thrilling when recorded on paper, were very different in actuality.

The value of Arctic and Antarctic exploration has often been questioned by the lay mind, when expeditions have ended in disaster and valuable lives have been sacrificed.

But the most striking example of the enormous value of Antarctic exploration is to be found in the development of the whale fisheries, which owe their inception to the enterprises of Captain Carl Larsen, who after various unsuccessful enterprises as far back as 1892 finally succeeded in floating the Argentine Fishing Company, which has been so successful that in some years a dividend of 100 per cent. has been paid.

It was through accompanying the Nordens Kjoeld expedition to Graham Land in 1902 that he discovered the possibilities for the exploitation of which he started the fishing company.

Other companies followed, and the industry in the neighborhood of Graham Land now gives employment to several thousand men, including the crews of the whalers and transport, and the workers ashore and ashore.

Scottish Farmers Favor Pools

Fast Experience In This Line Has Been Encouraging

The value of pools in the marketing of home farm produce was emphasized at the annual general meeting of the Scottish Agricultural Organization Society, in Edinburgh, after referring to the success of the milk pool and to the progress of the scheme for a national egg pool, said that the foundations of a Scottish national meat pool were now being laid.

The experiences of the last five months had been most satisfactory, and they noticed a definite change in the outlook, not only on the part of the producers, but on the part of the distributors, towards this better marketing. The pig trade in Scotland remained as chaotic as ever, but they were going to have these slaughter-houses as clearing-houses for pigs, and he believed that was how the pig trade difficulties were going to be solved. On the subject of a national potato pool, he said he hoped it would not be long before a scheme was evolved.

"Just a Slice Of Ham"

But With New Flavor

"They all said they weren't hungry—but look at the platter!" That's how it goes when you cook your slice of ham in Borden's St. Charles Milk, according to the recipe below. The mustard flavor is cooked in, and there's a suggestion of cloves, too.

Besides the extra-rich milk which gives every dish a superior savor and nutritive value, be sure to use St. Charles milk—ordinary milk is too thin.

You'll be surprised how different this dish is from just plain ham.

Baked Ham With St. Charles

1 slice ham cut about 1 1/2 inch thick, with rim of fat.

1 tablespoon sugar.

1 cup Borden's St. Charles Milk.

1 teaspoon mustard.

1 tablespoon flour.

1/2 teaspoon ground cloves.

3/4 cup water.

Trim off rim of fat and cut in very small pieces. Thoroughly mix flour and mustard and pat into ham. Place in rather deep pan. Mix together cloves and sugar and rub through the fat; place over top of ham. Dilute milk with water and pour over ham to cover. Bake in a moderate oven until ham is tender, about one hour. Add more milk as needed to cover ham while baking.

Good Lamb Chop

Southern Alberta flock owners are harvesting one of the best lamb crops in years, it was revealed at the annual meeting of the Southern Alberta Sheep Breeders' Association at Lethbridge, Alta., recently.

A leading authority on steel has stated that the world loses \$2,500,000,000 yearly due to the corrosion on steel.

Many a man learns to shirk for himself when he buys his first car.

Many Conveniences In British Post Office

People Accommodated In Many Ways For Small Charge

The British post office officials are capable and obliging and if anyone should lose himself, he can go to the nearest post office and mail himself home. An "express messenger" is sometimes given charge of a person and takes him to his destination, where he obtains a receipt. The charges, based upon the distance travelled, are quite moderate. If you merely wish to prove that a letter has been posted, there is no need to register it. The Post Office will supply you with a "certificate of posting" for a halfpenny. If you miss the last collection of letters and have an urgent communication to send, ring up the head post-office of the district, tell them your plight, and dictate the letter. It will be written out and sent off with the night mail. The charge is threepence for the first thirty words, a penny for every ten afterwards, and the ordinary postage and telephone fee.

Five Thousand New Farms

Increase In Cultivated Six Per Cent. Of Entire Alberta Area

Hon. George Howley estimates that 850,000 acres of land which was newly broken last season will be under crop this year in Alberta. That is equivalent to more than 5,000 farms of a quarter section each, all entirely under crop. Or to twice that number with half of each under crop. The increase is approximately six per cent. of the entire cultivated area in the province. In sixteen years at that rate of going the crop area would be doubled. And the outlook for that there will be more land broken this year than last. The old drivers and mining companies are not the only parties who are making a lively drive on the latent resources of the west. The chap who is ripping up the sod is also doing a turn that is worth making note of.

Disinfection Is the better part of squalor.

"Every sewer must one day rear from the seeds that has sown."

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctor's word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra box, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

Zam-Buk

ENDS PAIN.

EVERY MOTHER SHOULD KEEP A BOX ON HAND.

THE CRIMSON WEST

—BY—
ALEX. PHILIP

Published by Special Arrangement
With Thomas Allen, Publisher,
Toronto, Ont.

As dusk fell over lake and mountain, Donald returned from Wainwright's cabin. Andy glanced up expectantly as his friend appeared, but quickly averted his face as he saw Donald's features. Donald sank disconsolately to a seat outside the kitchen door. He had found Wainwright alone and wondered if Connie had purposely absented herself. Her treatment of him since her return puzzled him sorely and had filled him with a great despondency. As he rose and walked toward his cabin, Andy gazed after the retreating figure, eyes filled with compassion, then turned to speak to one of his helpers in such an irritable tone that the flunkey's mouth opened in astonishment.

For three evenings it was the same. Donald failed to find Connie at home, nor did she come to the mill. He regretfully decided that it was no coincidence, but that she was deliberately avoiding him.

On a Sunday afternoon Andy saw Donald gaze yearningly toward the bluff, then turn up the trail leading to the dam.

At Donald's request Gillis had diverted logging operations to circle the little oasis in the heavy timber, so that Connie's sylvan glade still held its primeval charm and beauty.

Donald stood for a moment gazing reflectively into the white foam at the foot of the tiny cataract, then threw himself on the soft bed of moss and closed his eyes. But this time the fairy spot did not bring the usual delicious languor to his harassed spirit. Birds sang as sweetly; flowers filled the air with the same odour; the wind sighed as softly through the tree-tops; and the small brook still sang its rippling song. The rapid tattoo of a woodpecker's bill on a hollow tree jarred his nerves and he tossed restlessly.

A cedar tip flared through the air. Flown by the wind, it fluttered in circles, then gently on the hands lying on his chest. His eyes opened, then, with trembling limbs, he came to his feet.

Connie, clad in faded overalls and cotton shirt, stood on the edge of the "teet." Her breast was heaving, her loosened golden hair flying in the wind. The softness in her blue eyes made Donald gasp, and his heart thumped as though it were in his throat.

"Connie!" he cried huskily. "I love you, dear! Don't you care for me a little?"

She sprang lightly to the ground and came toward him, her arms outstretched. Tears of joy coursed down her cheeks. "Oh, Donald, Donald, you big stupid!" she sobbed. "I have been waiting here for you every day. I—I have loved you always."

With a shock of incredible rapture Donald gathered her in his strong arms, where she cuddled like a weeping child. He kissed her red lips, her eyes, hair and throbbing throat. "My little Connie," he said, in a voice vibrant with feeling, "do you really love me?" He pressed his cheek to

hers and felt the flutter of her long lashes as she pressed the softness of her own cheek. The quick, exquisite indication of her sobbing breaths were lovely answering things, and he thrilled to hear her whisper: "Yes, Donald! Yes, Donald!"

Andy came walking meditatively up the path, his hands clasped behind him, his blond head bowed in deep thought. Not finding Donald at the dam, he walked up the hill to enter the meadow just as Donald clasped Connie in his arms. For an instant the little Australian stood rigid, his eyes bulging, then retreated hastily to the shelter of the trees. Any one seeing Andy at that moment would have thought him suddenly gone mad. He whirled about in a wild dance, hugging himself in an ecstasy of joy. Ceasing his mad gyrations, he dashed his hand across his eyes and bolted like a runaway down the hill.

Gillis and his "redshirts" sat sunning themselves on the steps of the dining-room. They sprang to their feet as Andy came tearing down the hill. Breathlessly Andy told them of the scene he had witnessed. "We'll give them a blinkin' good reception when they come down," he panted. He issued several sharp orders and the men hurriedly prepared to execute his commands.

The train that was to carry the excursionists to the Coast was being made up on the siding. While they were awaiting this, the visitors watched with curious interest the mysterious preparations being made by the loggers.

At this moment, hand in hand, Donald and Connie turned the corner of the building. As they did so they came to a sudden halt and stared at the odd scene before them. The men stood in two orderly rows. The ground between was carpeted with wildflowers, and each logger held a mass of blooms in his hand. At the far end of this lane of men stood Andy, a wide smile on his doll face. Connie lowered her eyes in confusion. Donald shook his fist at Andy. "You little beggar! You are responsible for this!"

Andy chuckled. "Come on, Connie, be a sport," he coaxed.

With flushed faces Donald and Connie walked down the aisle, while the men peeped from behind their hands in appreciation of this beautiful scene. As they neared the end of the gauntlet, Andy sprang to a stump.

"Three cheers for the 'appy couple!'" he yelled. A roar of cheering followed. "A tiger!" shouted Andy. And again the air trembled to the hoarse shout of brawny throats.

Donald led Connie straight to his mother. "Mother," he said bashfully, "meet your future daughter."

Quick tears came to his mother's eyes as Donald made this announcement. "My dear," she said tenderly, as her arms folded about Connie, "you are all love and tenderness."

The train's whistle screamed its warning and the crowd moved down to the station.

"Will you be coming home to us soon, Connie?" asked his father as he was leaving. Donald looked down at Connie.

"We'll visit you on our honeymoon, Dad," responded Donald happily. He swept his arm toward the mountains. "I could never leave this. The spell

of the Great West has entered my blood."

Janet had spent the afternoon paddling idly on the lake. When she received the news of Donald's engagement she concealed the ache in her heart by an outward air of indifference. The pretence of a headache enabled her to keep in her cabin and she did not appear for dinner. She wanted to be alone with her thoughts.

When the shadows lengthened, Donald and Connie moved slowly along the path toward the bluff. As they turned a curve in the trail Janet came to the window of her cabin and stood watching them until they disappeared from sight.

Andy, sitting a few feet distant with his back against a tree, noted the look of despondency on Janet's face. He came to his feet and walked slowly toward the kitchen. "As Methusalem said 'old is whiskeers,' 'e who 'olds 'is 'ead too 'igh will 'it 'is blinkin' toe'."

As the lovers were about to turn up the mountain trail, the trapper emerged from the woods with his old pack-horse. The cayuse was piled high with huggage.

"Where are you going, John?" queried Donald.

"I'm hittin' the trail, o' 'inner," said Connie.

"Yes, I'm quittin' the country," "Why?" questioned Donald.

"Gettin' too thickly settled. I feel that I ain't got room to breathe. I'm goin' way back into the 'Canyon somewhere so's I kin be by myself."

The race of medieval hermits is not dead. The spirit that led the first pioneers into the forest guides others there today. There are men whose souls long for a place untamed, who yearn to breathe the wild free air. They want a home straight from the hands of the Creator, unspoiled by man. They may be trappers, who brave cold and hardships to clothe inlaid in warm furs; they may be prospectors, who search out the hidden gold for others to use. Whatever they may be, these hardy men blaze the trail for others to follow.

When Donald told the trapper of the coming wedding the old man's eyes softened. "I'm glad, it's just right. I hoped you two would get married." He shook hands gravely then clucked to his horse.

"Good-bye, Connie! Good-bye, o' 'inner! God bless ye!" he shouted over his shoulder.

Donald and Connie stood watching the patient old figure as he trudged behind his cayuse. At a turn of the trail he stopped and for a long interval gazed back at the log cabin by the stream, which had been his home for so many years. He waved his hand in farewell, then horse and man disappeared from view.

When Donald and Connie reached the bluff the sun had sunk in the crimson west, leaving a rich afterglow that spread across the horizon from west to east, the rich colours merging, by slow degrees into that pure pearl-grey which makes the long and lovely twilight of the British Columbia mountains. Down on the lake mist was gathering, but in the upper sky and on the glaciers a vivid orange glow still lingered. The trees stood stiff and motionless in the quiet air. From afar, subdued but clear, came the hoot of a blue grouse, and from mountain gorges came the faint sighing sound of distant waterfalls. Sweet and pungent odours of wild flowers came from the woods about them. A star of silver brilliancy sparkled suddenly out of the sky over the massive snow-clad peaks.

"Venus," whispered Connie. Donald's gaze swept from the camp, nestled at their feet, to the darkening heavens, to the star of love, then down to the girl by his side.

There are moments in the lives of all men—regardless of creed or religion—when they feel the nearness of God. Such a moment came to Donald. He uttered no sound, yet his soul was crying out its great thankfulness. Connie sensed his feeling. She bowed her head, her eyes misty with joy and gratitude. "Oh, God," she murmured softly, "we thank Thee for Thy many blessings."

THE END.

Took It Literally

An income tax clerk recently received from a "client" a form which was incomplete. Thereupon he sent it back with large crosses in red ink where it was necessary to be filled in, with the words, "Please complete where marked in red ink." Some days later the following reply was received: "Dear Sir—I have no red ink—Your faithfully."

Sunday is being turned into doomsday.

Minard's Liniment—good for tired feet.

Variations Of Steel Tape

A 300-foot flat band steel tape will vary in length in the range of temperatures met with in Canada by several inches according to investigations of the Physical Testing Laboratory of the Topographical Survey, Department of the Interior.

BABY'S OWN TABLETS

WIN GREAT PRAISE

Many Mothers Always Keep Them In The House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets, Mrs. Donat Fleudre, Tugwick, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given to my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The St. Mary's Journal-Argus says there are 35,000 chances of making a typographical error in printing a page of news. Needless to say: there are no errorless pages.

Active In Rust Research

Woman Doctor Receives Appointment In Winnipeg Laboratory

Dr. Lillian Hollingshead has been appointed to the plant-breeding staff at the Dominion rust research laboratory, Winnipeg. She is a Canadian, her home being in Saskatchewan. She graduated with honors in arts and took post-graduate work in botanical sciences at the University of Saskatchewan, at Saskatoon, where she worked with Dr. W. P. Thompson on the cytology of wheat hybrids.

Miss Hollingshead has been working three years in California, with Drs. Godspeed, Clausen and Babcock, specializing in cytology, and has made some quite interesting discoveries in the cytology of tobacco hybrids, which findings were presented at the recent meeting of the American Association for the Advancement of Science at New York. At the rust research laboratory at Winnipeg she will co-operate with the plant-breeding specialist in attempting to produce rust resistant varieties of wheat.

Little Helps For This Week

"The example and shadow of heavenly things."—Hebrews viii, 5.

From the eternal shadow, rounding All our sun and starlight here, Voices o' four lost ones sounding, Bid us be of heart and cheer,— Through the silence down the spaces, Falling on the inward ear.

Know we not our dead are looking Downward with a sad surprise, All our strife of words rebuking, With their mild and loving eyes? Shall we grieve, the holy angels? Shall we cloud their blessed skies?

—John Greenleaf Whittier.

If ever I am tempted to do something which is easy and pleasant, instead of something hard and disagreeable, which nevertheless I ought to do, if I can only think of those lost saints of mine, who always expected me to do right, and always showed the way, at once my will is fortified. No matter if we have our living friends, who are a law unto our lives, a succor to our wills, the cloud of witnesses cannot be too full of eager and expectant souls. The influence of our loved dead comes to us purified of all earthly dress and stain—there is a flawless, moral inspiration.—John W. Chadwick.

First Cook—"What do you do with yourself now that the ice man is out of a job?"

Second Ditto—"Well, the man who collects instalments on the electric refrigerator ain't such a bad sort."

DOCTORS quite approve the quick comfort of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them marvelous at such times. The proven directions found in every package of Aspirin tell how to treat colds, sore throat, neuralgia, neuritis, etc. All druggists.

Stiffness

After strenuous activity, a rub down with Minard's Liniment will prevent aches and pains.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The test form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy stomach will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acidity. Each bottle contains full directions—any druggists.

Riding abreast of the times

You expect more from your motor car today than you did ten years ago. And you get it. Greater speed, smoother power and more responsive performance are common to modern cars as a result of the development of higher speed, higher compression motors.

These improved engines demand a better oil—fuller-bodied, with greater resistance to heat and wear.

To ensure a better motor oil, Imperial Oil Limited goes all the way to Peru for the crude from which to make Marvelube. Marvelube is made from a base that is rich in all the qualities necessary for better lubrication of the modern motor. It is today the oil standard for high-speed motors from coast to coast.

Marvelube is preferred by over half a million motorists in Canada and is the choice of aircraft operators because of its superior lubricating qualities.

There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. Consult the Marvelube Chart at Imperial Oil stations and dealers.

Marvelube

From far Peru comes a better crude to make a better motor oil

ORDINARY OATS OR HULLLESS OATS

At this time of the year in the prairie provinces the question is frequently asked regarding the advisability of sowing hullless oats in preference to hulled oats for ordinary farm purposes. The fact that the glumes do not adhere to the kernel of the hullless oats seems to appeal to the fancy of many farmers.

Hullless oats are not as useful a crop for most purposes for which oats are used as the ordinary hulled varieties. For the feeding of young calves or pigs or as a feed for poultry they are to be preferred to the hulled oats on account of the absence of the hull. As a concentrated feed for horses, however, ordinary oats, are far superior to hullless oats and on account of their bulky character are to be considered one of the safest of all feeds.

At the Dominion Experimental Farm, Indian Head, Saskatchewan, the best varieties of hullless oats such as Liberty and Laurel, have been tested for the past five years against standard hulled varieties like Banner and Victory. In these tests the hullless varieties have matured, on the average, seven days earlier than Banner or Victory but have yielded from twenty-two to twenty-four bushels to the acre less. This difference in yield is very significant indeed and should not be overlooked when considering the advisability of choosing between hullless oats or ordinary oats. Unless there is some very special reason for growing hullless oats, good varieties of the ordinary hulled sorts are likely to give better returns.

—J. G. Davidson, Dominion Experimental Farm, Indian Head, Sask.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.
